Subject index of volume 338

acetylcholine receptor channel, protein kinase C, phorbol esters; chick myotubes, 121
acetylcholine release, dopamine D2-receptors, ibotenic acid lesions; striatum, rats, 623
acetylcholine release, dopamine receptors; nucleus accumbens, rats, 250
acetylcholine release, potassium channel, neuromuscular junction, motor nerve terminals, mice, 133
ACTH, noradrenaline release; heart, rabbit, 368
A-current, potassium current, aminopyridine; anterior pituitary tumor cells, 125
adenosine A receptors, serotonin release; brain, rabbit, 664
adenosine receptors, receptor interaction, adrenoceptors, opioid receptors; brain cortex, rabbit, 53
adenylate cyclase, cAMP, G-protein, neuropeptide Y; cardiomyocytes, rats, 426
adrenaline, noradrenaline, capsaicin, vagal sensory nerves, hypoglycemia; adrenal medulla, rats, 282
adrenergic receptors, number regulation, noradrenaline infusion; rabbit, 517
adrenoceptors, inotropism; hypertensive rats, 383
adrenoceptors, opioid receptors, adenosine receptors, receptor interaction; brain cortex, rabbit, 53
adrenoceptors, p-tyramine, p-octopamine; vas deferens, rats, 39
agonist-receptor-interaction, iodocyanopindolol, beta 2-adrenoceptors, cAMP; human mononuclear leucocytes, 523
alpha 1-adrenoceptor agonists, phenoxybenzamine, calcium entry blockers; dog, rats, 234
alpha 1-adrenoceptors, inotropism, temperature sensitivity, receptor desensitization; heart, rats, 582
alpha2 adrenoceptors, L-654,284; calf cerebral cortex, 47
alpha 2-adrenoceptors, SK & F 104078, yohimbine; human saphenous vein, heart, rats, 379
alpha 2-adrenoceptors, UK-14,304, contractile activity; portal vein, rats, 239
alpha-adrenoceptor agonists, vasoconstriction, nicardipine; rat tail artery, 529
alpha adrenoceptor antagonists, enzyme release; heart, rats, 88
alpha-adrenoceptors, contractility, hypoxia, noradrenaline release; aortic strips, rabbit, 275
alpha-tocopherol, antioxidants, prostaglandin H synthase; vesicular glands, ram, 74
amine carrier, noradrenaline, cocaine; rat tail artery, 510
amine metabolism, phenylethylamine, dopamine, monoamine oxidase inhibitors; brain, mice, 644
amino acid decarboxylase, monoamine synthesis, NSD 1034, dopamine receptors; brain, rats, 148
aminopyridine, A-current, potassium current; anterior pituitary tumor cells, 125
amiodarone, antiarrhythmic agents; heart, guinea-pig, 589
analgesic drugs, buprenorphine; radioimmunoassay, 202
anaphylaxis, methacholine, thromboxane B2, muscarinic receptors; heart, guinea-pig, 577
angiotensin 2, renin-angiotensin system, cyclosporine A, bradykinin; saphenous vein, dog, 699
angiotensin 2-receptors, beta 2-adrenoceptors, vasopressor response, vascular renin-angiotensin system; pithed rats, 536
angiotensine 2, beta 1-adrenoceptors, tachycardia; pithed normotensive rats, 185
angiotensinogen gene expression, renin-angiotensin system; rats, 327
angiotensin receptors, sympathetic nerve, beta-adrenoceptors; human saphenous vein, pulmonary artery, 228
antiarrhythmic agents, amiodarone; heart, guinea-pig, 589
anticonvulsants, GABAergic transmission, biphasic effect, valproate; conscious rats, 658
anticonvulsants, GABAergic transmission, valproate; locus coeruleus, rats, 655
antidepressant drugs, monoamine oxidase B, phenylethylamine, benzylamine; human platelets, human brain, rat brain, 678
antidepressant drugs, neuroleptic drugs, magnesium, sodium; human erythrocytes, 332
antihypertensive effect, pinacidil, potassium channel, membrane potential; blood vessels, rats, 310
antioxidants, prostaglandin H synthase, alpha-tocopherol; vesicular glands, ram, 74
antiparkinsonian agents, parkinsonism, MPTP, PHNO; primates, 35
antipsychotic drugs, neuroleptics, dopamine D1 antagonists; caudate-putamen, mice, 162
apomorphine, dopamine, behavioural responsiveness, sensorimotor integration, sequencing of movements; rats, 489
apomorphine, haloperidol, dopaminergic mechanism; conditioning, rats, 671
arachidonate metabolites, platelet-activating factor, thromboxane A2, leukotrienes; lung, guinea-pig, 417
arachidonic acid, secretagogue, hormone release, calcium; anterior pituitary cells, rats, 303
ATP, G-proteins, purinoceptor P2, prostaglandins; astrocyte cultures, rats, 704
atropine, pirenzepine, M-cholinoceptor subtypes; man, rats, 19
autoinhibition, transmitter release; brain, rabbit, 632
autoregulation, TMB-8, calcium release; renal blood flow, dog, 293

Bay K 8644, calcium, verapamil; heart, dog, 196
behavioural responsiveness, sensorimotor integration, sequencing of movements, apomorphine, dopamine; rats, 489
benzylamine, antidepressant drugs, monoamine oxidase B, phenylethylamine; human platelets, human brain, rat brain, 678
beta 1-adrenoceptors, tachycardia, angiotensine 2; pithed normotensive rats, 185
beta 2-adrenoceptors, cAMP, agonist-receptor-interaction, iodocyanopindolol; human mononuclear leucocytes, 523
beta 2-adrenoceptors, vasopressor response, vascular renin-angiotensin system, angiotensin 2-receptors; pithed rats, 536
beta-adrenoceptors, angiotensin receptors, sympathetic nerve; human saphenous vein, pulmonary artery, 228
beta-adrenoceptors, catecholamines; rats, 215
beta-adrenoceptors, relaxation, dopamine, catecholamine; uterus, rats, 484
beta-endorphin, opioids; place conditioning, rats, 392
biphasic effect, valproate, anticonvulsants, GABAergic transmission; conscious rats, 658
blood flow, glucose utilisation, dihydroergocristine; conscious rats, 82
blood pressure, norepinephrine; hypertensive rats, 350
bradykinin, angiotensin 2, renin-angiotensin system, cyclosporine A; saphenous vein, dog, 699
bretylium, guanethidine, sympathetic nerves, transmitter release; vas deferens, guinea-pig, 504
buprenorphine, analgesic drugs; radioimmunoassay, 202

caffeine, calcium; aortic smooth muscle, rats, 443
calcitonin gene-related peptide, species differences, capsaicin, tachykinins; ureter, rats, guinea-pig, 407

calcium, arachidonic acid, secretagogue, hormone release; anterior pituitary cells, rats, 303
calcium, caffeine; aortic smooth muscle, rats, 443
calcium, depolarization, transmitter release, phorbol ester; neuromuscular junction, frog, 339
calcium, opioid receptors, cAMP, neurotransmitter release, noradrenaline release; brain, rats, 548
calcium, verapamil, Bay K 8644; heart, dog, 196
calcium channel, inotropism, DPI 201-106, cardiotonic agents; heart, guinea-pig, 684
calcium channel antagonists, inotropism, vasodilatation, garden-hose-effect; heart, rats, 211
calcium channel blocker, protein kinase C, phorbol esters; vascular smooth muscle, dog, 114
calcium entry blockers, alpha 1-adrenoceptor agonists, phenoxybenzamine; dog, rats, 234
calcium release, autoregulation, TMB-8; renal blood flow, dog, 293
cAMP, agonist-receptor-interaction, iodocyanopindolol, beta 2-adrenoceptors; human mononuclear leucocytes, 523
cAMP, G-protein, neuropeptide Y, adenylate cyclase; cardiomyocytes, rats, 426
cAMP, K-channel, vasoactive intestinal peptide, non-adrenergic nerves, non-cholinergic nerves; stomach, rats, 401
cAMP, neurotransmitter release, noradrenaline release, calcium, opioid receptors; brain, rats, 548
cAMP, octopamine, dopamine D1 receptors; jejunum, rabbit, 373
cAMP, OPC-8212, cardiotonic agents, inotropism; bovine heart phosphodiesterase, 692
capsaicin, cardiovascular system; urinary bladder, spinal cord, rats, 411
capsaicin, tachykinins, calcitonin gene-related peptide, species differences; ureter, rats, guinea-pig, 407
capsaicin, vagal sensory nerves, hypoglycemia, adrenaline, noradrenaline; adrenal medulla, rats, 282
cardiac metabolism, dobutamine, sympathomimetic drugs; heart-lung preparation, dog, 174
cardiotonic agents, calcium channel, inotropism, DPI 201-106; heart, guinea-pig, 684
cardiotonic agents, inotropism, cAMP, OPC-8212; bovine heart phosphodiesterase, 692
cardiovascular responses, neurokinins, NK-receptor subtypes; conscious rats, 649
cardiovascular system, capsaicin; urinary bladder, spinal cord, rats, 411
catalepsy, serotonin, 8-OHDPAT; rats, mice, 191
catecholamine, beta-adrenoceptors, relaxation, dopamine; uterus, rats, 484
catecholamine metabolites, dopamine D2 receptors; striatum, rats, 28
catecholamines, beta-adrenoceptors; rats, 215
catecholamines, clonidine, withdrawal; brainstem, hypertensive rats, 543
cholinergic motor neurons, opioid receptors; ileum, guinea-pig, 397
cholinomimetics, muscarine antagonists, pH, pirenzepine, telenzepine; iris in vivo, rats, 476
clonidine, withdrawal, catecholamines; brainstem, hypertensive rats, 543
cocaine, amine carrier, noradrenaline; rat tail artery, 510
compound 48/80, endorphin, neuropeptides, histamine liberation, substance P; mast cells, rats, 567
conotoxin-omega, transmitter release, substance P; smooth muscle, guinea-pig, rats, 107
contractile activity, alpha 2-adrenoceptors, UK-14,304; portal vein, rats, 239
contractile proteins, verapamil, diltiazem, sarcoplasmatic reticulum; striated muscle, rabbit, 297
contractility, hypoxia, noradrenaline release, alpha-adrenoceptors; aortic strips, rabbit, 275
cromakalim, potassium channel, vasorelaxant effect; vascular tissues, rats, guina-pig, 319
cyclosporine A, bradykinin, angiotensin 2, renin-angiotensin system; saphenous vein, dog, 699

deamination, O-methylation, isotope effects; heart, aorta, rats, 180
depolarization, 5-HT3-receptors; cervical sympathetic nerves, rabbit, 608
depolarization, transmitter release, phorbol ester, calcium; neuromuscular junction, frog, 339
dibenzoyldopamine, lipophilicity, prodrug, monobenzoyldopamine; CNS, rats, 497
dihydroergocristine, blood flow, glucose utilisation; conscious rats, 82
dihydropyridines, nitrendipine, inotropism, vascular activity; heart, guinea-pig, 449
3,4-dihydroxyphenylglycol, noradrenaline; fractional extraction, rabbit, 361
5-hydroxytryptamine, tryptophanhydroxylase, sex difference; brain, rats, 345
5-hydroxytryptamine receptors, thermoregulation; hypothalamus, rabbit, 256
diltiazem, sarcoplasmatic reticulum, contractile proteins, verapamil; striated muscle, rabbit, 297
dobutamine, sympathomimetic drugs, cardiac metabolism; heart-lung preparation, dog, 174
dopamine, behavioural responsiveness, sensorimotor integration, sequencing of movements, apomorphine; rats, 489
dopamine, catecholamine, beta-adrenoceptors, relaxation; uterus, rats, 484
dopamine, monoamine oxidase inhibitors, amine metabolism, phenylethylamine; brain, mice, 644
dopamine D1 antagonists, antipsychotic drugs, neuroleptics; caudate-putamen, mice, 162
dopamine D1 receptors, cAMP, octopamine; jejunum, rabbit, 373
dopamine D2 receptors, catecholamine metabolites; striatum, rats, 28
dopamine D2-receptors, ibotenic acid lesions, acetylcholine release; striatum, rats, 623
dopamine metabolism, nicotine, mecamylamine, pempidine; striatum, mice, 169
dopamine receptors, acetylcholine release; nucleus accumbens, rats, 250
dopamine receptors, amino acid decarboxylase, monoamine synthesis, NSD 1034; brain, rats, 148
dopaminergic mechanism, apomorphine, haloperidol; conditioning, rats, 671
DPI 201-106, cardiotonic agents, calcium channel, inotropism; heart, guinea-pig, 684

endorphin, neuropeptides, histamine liberation, substance P, compound 48/80; mast cells, rats, 567
endothelium-derived relaxant factor; femoral artery, rabbit, 438
enzyme release, alpha adrenoceptor antagonists; heart, rats, 88

GABAergic transmission, biphasic effect, valproate, anticonvulsants; conscious rats, 658
GABAergic transmission, valproate, anticonvulsants; locus coeruleus, rats, 655
garden-hose-effect, calcium channel antagonists, inotropism, vasodilatation; heart, rats, 211
gastric acid secretion, histamine, vagus nerve; intracerebroventricular administration, rats, 96
gastric damage, platelet-activating factor, ulcerogenic agent, neutrophils; gastrointestinal lesions, rats, 422
glucose, K-channel, sulfonylureas, insulin secretion; pancreatic islets, mice, 459
glucose utilisation, dihydroergocristine, blood flow; conscious rats, 82
G-protein, neuropeptide Y, adenylate cyclase, cAMP; cardiomyocytes, rats, 426
G-proteins, purinoceptor P2, prostaglandins, ATP; astrocyte cultures, rats, 704
guanethidine, sympathetic nerves, transmitter release, bretylium; vas deferens, guinea-pig, 504

H 75,77, monoaminergic neurons, monoamine oxidase, H 77,77; brain, rats, 143

H 77,77, H 75,77, monoaminergic neurons, monoamine oxidase; brain, rats, 143
haloperidol, dopaminergic mechanism, apomorphine; conditioning, rats, 671
histamine, histidine decarboxylase, histamine-N-methyltransferase; brain, hypertensive rats, 573
histamine, vagus nerve, gastric acid secretion; intracerebroventricular administration, rats, 96
histamine liberation, substance P, compound 48/80, endorphin, neuropeptides; mast cells, rats, 567
histamine-N-methyltransferase, histamine, histidine decarboxylase; brain, 5-HT-autoreceptors, 5-HT-receptor agonist, 8-OH-DPAT; brain, rats, 463
5-HT-receptor agonist, 8-OH-DPAT, 5-HT-autoreceptors; brain, rats, 463
5-HT-receptor subtypes, noradrenaline; saphenous vein, dog, 616
5-HT uptake, imipramine, plasma protein; platelets, rabbit, 1
5-HT2-antagonists, sympathetic outflow; bood pressure, cat, 601
5-HT3-receptors, depolarization; cervical sympathetic nerves, rabbit, 608
5-HT_3, quipazine, serotonin, species variations; brain, various species, 472
hypertensive rats, 573
histidine decarboxylase, histamine-N-methyltransferase, histamine; brain, hypertensive rats, 573
hormone release, calcium, arachidonic acid, secretagogue; anterior pituitary cells, rats, 303
hypoglycemia, adrenaline, noradrenaline, capsaicin, vagal sensory nerves; adrenal medulla, rats, 282
hypoxia, noradrenaline release, alpha-adrenoceptors, contractility; aortic strips, rabbit, 275

ibotenic acid lesions, acetylcholine release, dopamine D2-receptors; striatum, rats, 623
imipramine, plasma protein, 5-HT uptake; platelets, rabbit, 1
inotropism, adrenoceptors; hypertensive rats, 383
inotropism, cAMP, OPC-8212, cardiotonic agents; bovine heart phosphodiesterase, 692
inotropism, DPI 201-106, cardiotonic agents, calcium channel; heart, guinea-pig, 684
inotropism, temperature sensitivity, receptor desensitization, alpha 1-adrenoceptors; heart, rats, 582
inotropism, vascular activity, dihydropyridines, nitrendipine; heart, guinea-pig, 449
inotropism, vasodilatation, garden-hose-effect, calcium channel antagonists; heart, rats, 211
insulin secretion, glucose, K-channel, sulfonylureas; pancreatic islets, mice, 459
iodocyanopindolol, beta 2-adrenoceptors, cAMP, agonist-receptor-interaction; human mononuclear leucocytes, 523
isotope effects, deamination, O-methylation; heart, aorta, rats, 180
isotoxins, tetanus toxin, protoxin; limited proteolysis, 99

K-channel, sulfonylureas, insulin secretion, glucose; pancreatic islets, mice, 459
K-channel, vasoactive intestinal peptide, non-adrenergic nerves, non-cholinergic nerves, cAMP; stomach, rats, 401

L-654,284, alpha2 adrenoceptors; calf cerebral cortex, 47
leucocytes, myeloperoxidase, prostaglandin E1; myocardial injury, cat, 268
leukotrienes, arachidonate metabolites, platelet-activating factor, thromboxane A2; lung, guinea-pig, 417
lipophilicity, pro-drug, monobenzoyldopamine, dibenzoyldopamine; CNS, rats, 497

magnesium, sodium, antidepressant drugs, neuroleptic drugs; human erythrocytes, 332
M-cholinoceptor subtypes, atropine, pirenzepine; man, rats, 19
M-cholinoceptor subtypes, pirenzepine; bovine cerebral cortex, rat salivary gland, 207
mecamylamine, pempidine, dopamine metabolism, nicotine; striatum, mice, 169
membrane potential, antihypertensive effect, pinacidil, potassium channel; blood vessels, rats, 310
methacholine, thromboxane B2, muscarinic receptors, anaphylaxis; heart, guinea-pig, 577
methoctramine, muscarinic receptor subtypes; rats, 246
monoamine oxidase, H 77,77, H 75,77, monoaminergic neurons; brain, rats, 143
monoamine oxidase A, serotonin metabolism; spinal cord, rats, 9
monoamine oxidase B, phenylethylamine, benzylamine, antidepressant drugs; human platelets, human brain, rat brain, 678
monoamine oxidase inhibitors, amine metabolism, phenylethylamine, dopamine; brain, mice, 644
monoaminergic neurons, monoamine oxidase, H 77,77, H 75,77; brain, rats, 143
monoamine synthesis, NSD 1034, dopamine receptors, amino acid decarboxylase; brain, rats, 148
monobenzoyldopamine, dibenzoyldopamine, lipophilicity, pro-drug; CNS, rats, 497
MPTP, PHNO, antiparkinsonian agents, parkinsonism; primates, 35
muscarine antagonists, pH, pirenzepine, telenzepine, cholinomimetics; iris in vivo, rats, 476
muscarine receptors, receptor heterogeneity; phrenic nerve, rats, 138
muscarinic receptors, anaphylaxis, methacholine, thromboxane B2; heart, guinea-pig, 577
muscarinic receptor subtypes, methoctramine; rats, 246
myeloperoxidase, prostaglandin E1, leucocytes; myocardial injury, cat, 268

neurokinins, NK-receptor subtypes, cardiovascular responses; conscious rats, 649
neuroleptic drugs, magnesium, sodium, antidepressant drugs; human erythrocytes, 332
neuroleptics, dopamine D1 antagonists, antipsychotic drugs; caudate-putamen, mice, 162
neuromuscular junction, acetylcholine release, potassium channel, motor nerve terminals, mice, 133
neuropeptides, histamine liberation, substance P, compound 48/80, endorphin; mast cells, rats, 567
neuropeptide Y, adenylate cyclase, cAMP, G-protein; cardiomyocytes, rats, 426
neurotransmitter release, noradrenaline release, calcium, opioid receptors, cAMP; brain, rats, 548
neutrophils, gastric damage, platelet-activating factor, ulcerogenic agent; gastrointestinal lesions, rats, 422
nicardipine, alpha-adrenoceptor agonists, vasoconstriction; rat tail artery, 529
nicotine, mecamylamine, pempidine, dopamine metabolism; striatum, mice, 169
nitrendipine, inotropism, vascular activity, dihydropyridines; heart, guinea-pig, 449
NK-receptor subtypes, cardiovascular responses, neurokinins; conscious rats, 649
non-adrenergic nerves, non-cholinergic nerves, cAMP, K-channel, vasoactive intestinal peptide; stomach, rats, 401
non-cholinergic contraction, substance P-like peptide; intestinal bulb, carp, 68
non-cholinergic contractions, peptide YY; small intestine, rats, 287
non-cholinergic nerves, cAMP, K-channel, vasoactive intestinal peptide, non-adrenergic nerves; stomach, rats, 401
noradrenaline, capsaicin, vagal sensory nerves, hypoglycemia, adrenaline; adrenal medulla, rats, 282
noradrenaline, cocaine, amine carrier; rat tail artery, 510
noradrenaline, 3,4-dihydroxyphenylglycol; fractional extraction, rabbit, 361
noradrenaline, 5-HT-receptor subtypes; saphenous vein, dog, 616
noradrenaline infusion, adrenergic receptors, number regulation; rabbit, 517

noradrenaline release, ACTH; heart, rabbit, 368
noradrenaline release, alpha-adrenoceptors, contractility, hypoxia; aortic strips, rabbit, 275
noradrenaline release, calcium, opioid receptors, cAMP, neurotransmitter release; brain, rats, 548
noradrenaline release, purinoceptors; caudal artery, rats, 221
noradrenaline release, receptor activation; brain cortex, rabbit, 62
norepinephrine, blood pressure; hypertensive rats, 350
NSD 1034, dopamine receptors, amino acid decarboxylase, monoamine synthesis; brain, rats, 148
number regulation, noradrenaline infusion, adrenergic receptors; rabbit, 517
octopamine, dopamine D1 receptors, cAMP; jejunum, rabbit, 373

8-OHDPAT, catalepsy, serotonin; rats, mice, 191
8-OH-DPAT, 5-HT-autoreceptors, 5-HT-receptor agonist; brain, rats, 463
O-methylation, isotope effects, deamination; heart, aorta, rats, 180
OPC-8212, cardiotonic agents, inotropism, cAMP; bovine heart phosphodiesterase, 692
opioid inhibition, potassium channels, oxytocin release, vasopressin release; neurohypophysis, rats, 560
opioid receptors, adenosine receptors, receptor interaction, adrenoceptors; brain cortex, rabbit, 53
opioid receptors, cAMP, neurotransmitter release, noradrenaline release, calcium; brain, rats, 548
opioid receptors, cholinergic motor neurons; ileum, guinea-pig, 397
opioids, beta-endorphin; place conditioning, rats, 392
opioid tolerance, spare receptors; myenteric plexus, guinea-pig, 553
oxytocin release, vasopressin release, opioid inhibition, potassium channels; neurohypophysis, rats, 560

parkinsonism, MPTP, PHNO, antiparkinsonian agents; primates, 35
pempidine, dopamine metabolism, nicotine, mecamylamine; striatum, mice, 169
peptide YY, non-cholinergic contractions; small intestine, rats, 287
pH, pirenzepine, telenzepine, cholinomimetics, muscarine antagonists; iris in vivo, rats, 476
phenoxybenzamine, calcium entry blockers, alpha 1-adrenoceptor agonists; dog, rats, 234
phenylethylamine, benzylamine, antidepressant drugs, monoamine oxidase B; human platelets, human brain, rat brain, 678
phenylethylamine, dopamine, monoamine oxidase inhibitors, amine metabolism; brain, mice, 644
PHNO, antiparkinsonian agents, parkinsonism, MPTP; primates, 35
phorbol ester, calcium, depolarization, transmitter release; neuromuscular junction, frog, 339
phorbol esters, acetylcholine receptor channel, protein kinase C; chick myotubes, 121
phorbol esters, calcium channel blocker, protein kinase C; vascular smooth muscle, dog, 114
pinacidil, potassium channel, membrane potential, antihypertensive effect; blood vessels, rats, 310
pirenzepine, M-cholinoceptor subtypes, atropine; man, rats, 19
pirenzepine, M-cholinoceptor subtypes; bovine cerebral cortex, rat salivary gland, 207
pirenzepine, telenzepine, cholinomimetics, muscarine antagonists, pH; iris in vivo, rats, 476
plasma protein, 5-HT uptake, imipramine; platelets, rabbit, 1
platelet-activating factor, thromboxane A2, leukotrienes, arachidonate metabolites; lung, guinea-pig, 417
platelet-activating factor, ulcerogenic agent, neutrophils, gastric damage; gastrointestinal lesions, rats, 422
platelets, stenosis, thrombosis; femoral artery, dog, 430
p-octopamine, adrenoceptors, p-tyramine; vas deferens, rats, 39
polysomes, RNA, tetracyclines; liver, mice, 455
potassium channel, membrane potential, antihypertensive effect, pinacidil; blood vessels, rats, 310
potassium channel, neuromuscular junction, acetylcholine release, motor nerve terminals, mice, 133
potassium channel, vasorelaxant effect, cromakalim; vascular tissues, rats, guina-pig, 319
potassium channels, oxytocin release, vasopressin release, opioid inhibition; neurohypophysis, rats, 560
potassium current, aminopyridine, A-current; anterior pituitary tumor cells, 125
pro-drug, monobenzoyldopamine, dibenzoyldopamine, lipophilicity; CNS, rats, 497
prostaglandin E1, leucocytes, myeloperoxidase; myocardial injury, cat, 268
prostaglandin H synthase, alpha-tocopherol, antioxidants; vesicular glands, ram, 74
prostaglandins, ATP, G-proteins, purinoceptor P2; astrocyte cultures, rats, 704
protein kinase C, phorbol esters, acetylcholine receptor channel; chick myotubes, 121
protein kinase C, phorbol esters, calcium channel blocker; vascular smooth muscle, dog, 114
protoxin, isotoxins, tetanus toxin; limited proteolysis, 99
p-tyramine, p-octopamine, adrenoceptors; vas deferens, rats, 39
purinoceptor P2, prostaglandins, ATP, G-proteins; astrocyte cultures, rats, 704
purinoceptors, noradrenaline release; caudal artery, rats, 221

quipazine, serotonin, species variations, 5-HT_3; brain, various species, 472
receptor activation, noradrenaline release; brain cortex, rabbit, 62

receptor desensitization, alpha 1-adrenoceptors, inotropism, temperature sensitivity; heart, rats, 582
receptor heterogeneity, muscarine receptors; phrenic nerve, rats, 138
receptor interaction, adrenoceptors, opioid receptors, adenosine receptors; brain cortex, rabbit, 53
relaxation, dopamine, catecholamine, beta-adrenoceptors; uterus, rats, 484
renin-angiotensin system, angiotensinogen gene expression; rats, 327
renin-angiotensin system, cyclosporine A, bradykinin, angiotensin 2; saphenous vein, dog, 699
RNA, tetracyclines, polysomes; liver, mice, 455

sarcoplasmatic reticulum, contractile proteins, verapamil, diltiazem; striated muscle, rabbit, 297
secretagogue, hormone release, calcium, arachidonic acid; anterior pituitary cells, rats, 303
sensorimotor integration, sequencing of movements, apomorphine, dopamine, behavioural responsiveness; rats, 489
sequencing of movements, apomorphine, dopamine, behavioural responsiveness, sensorimotor integration; rats, 489
serotonin, 8-OHDPAT, catalepsy; rats, mice, 191
serotonin, species variations, 5-HT_3, quipazine; brain, various species, 472
serotonin autoreceptors, serotonin release; brain cortex, pig, 14
serotonin metabolism, monoamine oxidase A; spinal cord, rats, 9
serotonin release, adenosine A receptors; brain, rabbit, 664
serotonin release, serotonin autoreceptors; brain cortex, pig, 14
sex difference, 5-hydroxytryptamine, tryptophanhydroxylase; brain, rats, 345
SK & F 104078, yohimbine, alpha 2-adrenoceptors; human saphenous vein, heart, rats, 379
sodium, antidepressant drugs, neuroleptic drugs, magnesium; human erythrocytes, 332
spare receptors, opioid tolerance; myenteric plexus, guinea-pig, 553
species differences, capsaicin, tachykinins, calcitonin gene-related peptide; ureter, rats, guinea-pig, 407

species variations, 5-HT_3, quipazine, serotonin; brain, various species, 472
stenosis, thrombosis, platelets; femoral artery, dog, 430
substance P, compound 48/80, endorphin, neuropeptides, histamine liberation; mast cells, rats, 567
substance P, conotoxin-omega, transmitter release; smooth muscle, guinea-pig, rats, 107
substance P-like peptide, non-cholinergic contraction; intestinal bulb, carp, 68
sulfonylureas, insulin secretion, glucose, K-channel; pancreatic islets, mice, 459
sympathetic nerve, beta-adrenoceptors, angiotensin receptors; human saphenous vein, pulmonary artery, 228
sympathetic nerves, transmitter release, bretylium, guanethidine; vas deferens, guinea-pig, 504
sympathetic outflow, 5-HT2-antagonists; bood pressure, cat, 601
sympathomimetic drugs, cardiac metabolism, dobutamine; heart-lung preparation, dog, 174

tachycardia, angiotensine 2, beta 1-adrenoceptors; pithed normotensive rats, 185
tachykinins, calcitonin gene-related peptide, species differences, capsaicin; ureter, rats, guinea-pig, 407
telenzepine, cholinomimetics, muscarine antagonists, pH, pirenzepine; iris in vivo, rats, 476
temperature sensitivity, receptor desensitization, alpha 1-adrenoceptors, inotropism; heart, rats, 582
tetanus toxin, protoxin, isotoxins; limited proteolysis, 99
tetracyclines, polysomes, RNA; liver, mice, 455
thermoregulation, 5-hydroxytryptamine receptors; hypothalamus, rabbit, 256
thrombosis, platelets, stenosis; femoral artery, dog, 430
thromboxane A2, leukotrienes, arachidonate metabolites, platelet-activating factor; lung, guinea-pig, 417
thromboxane B2, muscarinic receptors, anaphylaxis, methacholine; heart, guinea-pig, 577
thyreotropin-releasing hormone, YM-14673; avoidance response, rats, mongolian gerbils, 262
TMB-8, calcium release, autoregulation; renal blood flow, dog, 293
transmitter release, autoinhibition; brain, rabbit, 632
transmitter release, bretylium, guanethidine, sympathetic nerves; vas deferens, guinea-pig, 504
transmitter release, phorbol ester, calcium, depolarization; neuromuscular junction, frog, 339
transmitter release, substance P, conotoxin-omega; smooth muscle, guinea-pig, rats, 107
tryptophanhydroxylase, sex difference, 5-hydroxytryptamine; brain, rats, 345

UK-14,304, contractile activity, alpha 2-adrenoceptors; portal vein, rats, 239
ulcerogenic agent, neutrophils, gastric damage, platelet-activating factor; gastrointestinal lesions, rats, 422

vagal sensory nerves, hypoglycemia, adrenaline, noradrenaline, capsaicin; adrenal medulla, rats, 282
vagus nerve, gastric acid secretion, histamine; intracerebroventricular administration, rats, 96
valproate, anticonvulsants, GABAergic transmission, biphasic effect; conscious rats, 658
valproate, anticonvulsants, GABAergic transmission; locus coeruleus, rats, 655
vascular activity, dihydropyridines, nitrendipine, inotropism; heart, guinea-pig, 449
vascular renin-angiotensin system, angiotensin 2-receptors, beta 2-adrenoceptors, vasopressor response; pithed rats, 536
vasoactive intestinal peptide, non-adrenergic nerves, non-cholinergic nerves, cAMP, K-channel; stomach, rats, 401
vasoconstriction, nicardipine, alpha-adrenoceptor agonists; rat tail artery, 529
vasodilatation, garden-hose-effect, calcium channel antagonists, inotropism; heart, rats, 211
vasopressin release, opioid inhibition, potassium channels, oxytocin release; neurohypophysis, rats, 560
vasopressor response, vascular renin-angiotensin system, angiotensin 2-receptors, beta 2-adrenoceptors; pithed rats, 536
vasorelaxant effect, cromakalim, potassium channel; vascular tissues, rats, guina-pig, 319
verapamil, Bay K 8644, calcium; heart, dog, 196
verapamil, diltiazem, sarcoplasmatic reticulum, contractile proteins; striated muscle, rabbit, 297

withdrawal, catecholamines, clonidine; brainstem, hypertensive rats, 543

YM-14673, thyreotropin-releasing hormone; avoidance response, rats, mongolian gerbils, 262
yohimbine, alpha 2-adrenoceptors, SK & F 104078; human saphenous vein, heart, rats, 379
